Parking Loop

Product information

The RidgeGear Plastic Parking Loop is a harness accessory designed to provide a dedicated parking point for compatible lanyard connectors. Fitted to the shoulder straps of a fall protection harness, it keeps connectors securely stowed when not in use, helping prevent lanyards from trailing and reducing trip hazards during movement.

Best used for:

- Fall protection harnesses requiring convenient lanyard stowage during work at height.
- Construction, industrial maintenance, utilities, and inspection tasks where loose lanyards may create trip hazards.

Product benefits:

- Attaches to harness shoulder straps for convenient connector parking.
- Helps prevent lanyards trailing on the ground during movement.
- Keeps connectors securely stowed when not in active use.
- Plastic construction provides a lightweight harness accessory.
- Simple design supports organised equipment management on the harness
