Fall Arrest Block Defender RGA20 DEF

Product information

The largest fall arrest block from the Defender range, produced with a 20m galvanised wire. Its substantial length means it is perfectly suited for most working at height situations, and should avoid having to be repositioned multiple times during a job. A fall indicator is built into the the aluminium swivel hook. The Defender range as a whole offers a lighter more compact alternative to traditional fall arrest blocks, without losing any of their benefits. They have a sleeker design and top swivel to help with connection.
