Safety Harness RGH2

Product information

The RIDGEGEAR RGH2 Front & Rear D Safety Harness is a two-point full body harness designed for fall arrest and work restraint applications. Featuring front and rear attachment points, it supports a wide range of working at height tasks, including construction, scaffolding and maintenance, where versatility, adjustability and reliable attachment are required. Conforms to EN 361:2002.

Best used for:

- Construction, scaffolding, maintenance and general industrial work at height.
- Fall arrest systems, vertical climbing with compatible rope systems, and work restraint applications.

Product benefits:

- Front and rear D-rings support fall arrest and restraint applications.
- Fully adjustable shoulder straps provide a secure, personalised fit.
- Rip-stitch fall indicators simplify inspection after a fall event.
- 45 mm RIDGE Protect antibacterial polyester webbing helps reduce bacterial growth.
- High tensile steel alloy fittings deliver strength with a lightweight 1.1 kg design
