Fork Mounted Wheelie Bin Stacker

Product information

Designed to lift 2 stacks of 120 or 240 litre wheelie bins 14 high, or 1 stack of 1100 litre bins, to a maximum lifting capacity of 500kg. The attachment is held in place on the forklift by heel pin retention with forks up to 1200mm long, or thumbscrew retention if longer (dependant upon truck fork design). Alternative versions available to handle triple or quad stacks of bins. Simply attach the lifter to the forks, drive forward to the front face of the bin & lift. The attachment will fit into the recesses under the top lip & lift safely & securely on standard bin configurations, to allow vehicle loading / emptying with reduced manual handling effort.

Standard Features

- Heel pin or thumbscrew retention for safety in use
- Designed for 2 x stacks wheelie bins
- Max Fork section 150 x 50mm
- Fork pockets set at 800mm centres
- Painted bright orange for safety

Optional Features

- 3 or 4 stack versions also available
