

Static Bulk Bag Hopper with Fork Pockets

Product information

The Static Bulk Bag Hopper is an ideal and versatile attachment to fill Bulk Bags safely and effectively. The bags are placed on an empty pallet and then suspended on 4 hooks these allow quick fitment whilst holding the bag securely in place during the filling operation

The hopper is manufactured with in-built fork sleeves in the base to allow easy repositioning around the site.

Standard Features

- Robust Construction
- Four Bag Hoop Restraints
- Reduced Height Loading Lip
- Fork Pockets to suit 150 x 60 fork section
- Painted bright orange for safety
