

Gas Bottle Cage

Product information

The Gas bottle lifting cage is designed for rugged steel construction as it provides a safe method for lifting standard gas bottles with ease. The strength of the cage is designed for the on-site lifting of a number of standard gas bottles such as oxygen and carbon dioxide in a safe and controlled manner.

This cage comes in three different weights from 350 to 530 and 550kg.

The advantage of a gas bottle lifting cage can be used with either a crane or a fork lift truck depending on what is most suited to site.
