Tension Tester - Eye Bolt Tester 25kn

Product information

Hydrajaws model 2000 medium duty fixing testers enable engineers to confirm the holding power of anchors in most construction materials, either for the purpose of establishing safe working loads or to validate the correct installation of existing fixings.
The tension load of up to 25kn is applied to the fixing mechanically and hydraulics are used to register the load through an accurate analogue gauge, making the tester very reliable.
