

## Weighing Pallet Truck

---

### Product information

If you need to weigh a pallet, stillage, crate or similar receptacle, you can use a weighing hand pallet truck.

These pallet trucks have a built in scale typically set to 2000kg. If your application requires

it we can re-calibrate the pallet trucks to lower capacities which gives higher accuracy.

Weighing pallet trucks are often also used as portable scales so you do not have to move the load.
