Glass and Material Lift GML 800+

Product information

Heavy-duty material lift designed for lifting and positioning heavy construction materials with precision. With an 800 kg Safe Working Load and a maximum lifting height of 7.5 m, it is well suited to glazing, steel installation, and other demanding indoor material handling applications.

Best used for:

- Installing glazing, conservatories, facade panels, and steel sections.
- Indoor construction projects requiring controlled lifting of heavy materials to elevated positions.

Product benefits:

- Lifts loads up to 800 kg SWL to a maximum height of 7.5 m.
- Manual worm gear winch provides controlled and precise lifting.
- Steel chassis delivers durability for demanding site conditions.
- Locking castors support accurate positioning and in-line steering.
- Push-around design enables use in confined indoor work areas.
