Backpack RGS2 20L

Product information

The RIDGEGEAR 20L Backpack is a lightweight equipment bag designed for storing and transporting height safety equipment such as harnesses, lanyards, and accessories. Manufactured from recycled polyester, it provides organised storage with easy access to equipment while supporting everyday use on-site or between locations.

Best used for:

- Carrying harnesses, lanyards, connectors, and other height safety equipment.
- Daily transport and organised storage of PPE for construction, maintenance, and industrial work.

Product benefits:

- Recycled polyester construction offers a lightweight and durable storage solution.
- Full-opening main compartment allows quick packing and easy equipment access.
- Internal storage compartments help organise smaller equipment and accessories.
- Separate front pocket keeps frequently used items within easy reach.
- Mesh-padded shoulder straps and back panel improve carrying comfort during transport.
