

Safety Harness RGH2 Deluxe

Product information

The RIDGEGEAR RGH2 Deluxe Front & Rear D Safety Harness is a two-point full body harness designed for fall arrest and work restraint applications where enhanced wearer comfort is required. Shoulder and leg comfort pads, combined with fast fit buckles and front and rear attachment points, make it suitable for prolonged use across construction, scaffolding and industrial maintenance.

Best used for:

- Construction, scaffolding, industrial maintenance and general work at height.
- Fall arrest, work restraint and vertical climbing with compatible fall protection equipment.

Product benefits:

- Front and rear D-rings support versatile fall arrest and restraint applications.
- Fast fit chest and leg buckles enable quicker harness fitting and removal.
- Shoulder and leg comfort pads improve comfort during extended wear.
- Rip-stitch fall indicators and high contrast stitching simplify harness inspection.
- Fully adjustable design with 45 mm RIDGE Protect antibacterial polyester webbing and high tensile steel fittings.
