Safety Harness RGH2 Fast Fit

Product information

The RIDGEGEAR RGH2 Fast Fit Front & Rear D Safety Harness is a two-point full body harness designed for fall arrest and work restraint applications where rapid donning and removal are important. Front and rear attachment points combined with quick release buckles help reduce fitting time while maintaining a secure, adjustable fit.

Best used for:

- Construction, scaffolding, industrial maintenance and general work at height.
- Tasks requiring frequent harness removal and refitting during the working day.

Product benefits:

- Fast fit buckles on chest and legs enable quicker harness fitting and removal.
- Front and rear D-rings support fall arrest and work restraint systems.
- Fully adjustable shoulder straps provide a secure, customised fit.
- Rip-stitch fall indicators simplify inspection following a fall event.
- 45 mm RIDGE Protect antibacterial polyester webbing with high tensile steel fittings offers durability and lightweight performance.
