Work Positioning Harness RGH6

Product information

The RIDGEGEAR RGH6 is a full body work positioning harness designed for professionals who perform prolonged hands-free tasks while working at height. Combining front, rear and side attachment points with an integrated work positioning belt, it supports fall arrest and work positioning applications in construction, telecommunications, utilities and industrial maintenance.

Best used for:

- Prolonged work positioning on towers, structures, scaffolding and industrial installations.
- Construction, telecom, utility and maintenance work requiring both fall arrest and hands-free positioning.

Product benefits:

- Front, rear and side D-rings support versatile fall arrest and work positioning.
- Deluxe waist belt and shoulder pad improve comfort during extended wear.
- Quick-fit adjustable buckles provide secure fitting across multiple body sizes.
- Four integrated tool loops keep essential equipment accessible while working.
- Rip-stitch fall indicators simplify inspection following a fall event.
