

Ladder Restraint Lanyard RGL31

Product information

The RidgeGear RGL31 Ladder Restraint Lanyard is a short work restraint lanyard specifically designed for ladder climbing where minimal lanyard length is required. Two attachment points allow the working length to be adjusted between the user and the ladder, helping maintain appropriate restraint while climbing.

Best used for:

- Ladder climbing where a short adjustable restraint lanyard is required.
- Work restraint applications with no risk of a fall and a suitable anchor point.

Product benefits:

- Dual attachment points provide quick length adjustment between 0.44 m and 0.56 m.
- 26 mm polyester webbing with 37 kN strength offers long-lasting durability.
- Water-repellent webbing coating helps extend service life.
- Supplied with steel screwgate karabiner and lightweight aluminium scaffold hook [... Read more](#)

Material: 26mm RIDGE Protect anti-bacterial polyester

Marking: According to standard

Standard: EN 354

Warning: Restraint only - Not to be used as fall arrest
