

Webbing Extension Strop RGL4

Product information

The RidgeGear RGL4/K12 Webbing Extension Strop is designed to extend the rear attachment point of a full body safety harness, allowing users to connect more easily to compatible fall arrest blocks. By bringing the attachment point into the user's field of vision, it simplifies self-connection while maintaining a dedicated restraint configuration.

Best used for:

- Extending the rear harness attachment point for easier self-connection to compatible fall arrest blocks.
- Work restraint applications where improved access to the harness attachment point is required.

Product benefits:

- Extends rear D-ring into view for easier self-connection.
- 26 mm polyester webbing with 32 kN strength improves durability.
- Water-repellent coating helps extend product service life.
