

LIFTING PROJECTS UK

PLANNING | EQUIPMENT | PROJECT

WELCOME TO LIFTING PROJECTS UK

For over 15 years, we have been dedicated to offering specialised lifting solutions to our clients. Our experienced team, ranging from management to on-site personnel, has successfully managed and executed contract lift and machine moving projects for 40 years.

We have a rapidly expanding fleet of plant and equipment that can be paired with the latest lifting and transportation methods available in the market, ensuring a cost-effective solution tailored to your specific needs. We have carefully selected a diverse supply chain that provides unique support for our projects and enhances our own capabilities.

Our approach is rooted in partnership with our customers, aiming to efficiently accomplish the task at hand while considering the interests of all parties involved. We value your input and strive to bring your vision to life, whether it involves lift and shift operations, machinery moving, contract lifting, heavy and specialised lifting equipment, or custom fabrication work, safety and professionalism are of utmost importance to us.

We are part of the Axel Johnson International Lifting Solutions Group UK. We have global partners adding support, capability and experience in all aspects of lifting.

| WHAT WE DO

MACHINERY INSTALLATION

Our management team brings extensive expertise in utilising a wide range of equipment and systems, including Jacking Systems, specialised forklifts/versalifts, pick and carry cranes, gantries, chain blocks, jacks, skates, and more.

By carefully selecting the most suitable equipment for your specific project, which may also involve specialised transport and customised tools, we can offer a comprehensive turnkey solution. Whether you require downsizing or relocation assistance for your premises, we are here to support you.

Additionally, if you are experiencing increased demand for your product and need to install new machinery or move to larger facilities, Lifting Projects UK can provide a tailored package to meet your requirements, regardless of scale. From meticulous planning to supplying skilled labour, lifting and handling equipment, transportation, and other specialised services necessary for the successful completion of your project, we can customise a package that aligns with your needs and budget.

CONTRACT LIFTING

Safety always comes first when it comes to contract lifting and we understand the pressure and importance of selecting the right crane for any job, regardless of its size.

With our expertise and knowledge of cranes, coupled with the availability of our supplier framework, you can have peace of mind knowing that we will manage the requirements from start to finish.

In addition to our own fleet of cranes starting from 2 tons and upwards, we have carefully selected supply chain partners to further enhance our capabilities and because we are not limited by the capabilities of our own fleet we are confident that we can provide you with the perfect crane solution for your project. Our commitment to providing a total project management service means that we take care of every detail which includes meticulous planning, the provision of skilled labour, equipment hire, and any necessary project insurance.

Lifting Projects will handle all aspects of lifting logistics with expert care and precision, ensuring a seamless experience.

FACTORY RELOCATIONS

Lifting Projects can provide expert advice and assistance in the planning stages of a factory relocation.

We can assess the scope of the project, evaluate the equipment and machinery involved, and develop a comprehensive relocation plan. Lifting Projects can provide rigging services, utilising cranes, hoists, and other lifting equipment to lift and load machinery onto transport vehicles and can also coordinate the logistics of transportation, ensuring the safe delivery of the machinery to the new factory location.

We can also unload machinery and equipment from the transport vehicles and carefully install them in their designated positions and have the expertise to ensure proper alignment and installation helping to minimise downtime and ensure operational efficiency. Feel free to contact us and we can provide detailed information on our services, expertise, and how we can assist you with your factory relocation project.

INDOOR AND OUTDOOR STORAGE

Lifting Projects can provide full logistics packages specifically tailored to your needs and requirements.

From professional packaging for transportation, storage or export; to indoor or outdoor storage facilities along with specialist transport services to ensure your goods are delivered safely and on time. Transport from specialist low loaders down to small rigid vehicles and vans can be supplied to suit your needs, additional lorry loader capability can be provided for kerb side deliveries or part of an installation or relocation project. Full control of the logistics package as part our turnkey service gives you full control of your project and all through one company.

BESPOKE LIFTING SOLUTIONS

Lifting Projects UK stock a comprehensive range of lifting gear to meet the demands of any complex or challenging heavy lift project.

Our Modular lifting beams up to 1000t and up to up to 26m in length are readily available with a comprehensive range of heavy capacity Dyneema slings ranging from 200t to 600t and from 5m to 50m in length.

This equipment used in conjunction with our underbeams, multipoint and counterbalance beams, C hooks and bespoke lifting solutions means that whatever lifting challenge to be overcome we are equipped to offer a solution.

Any lifting arrangement engineered by Lifting Projects will be supplied with a detailed 3D lifting arrangement drawing taking the guesswork out of putting tackle together on site, saving time and ensuring the safety of everyone involved in the lift.

LIFTING EQUIPMENT HIRE

Lifting Projects offers a comprehensive lifting equipment hire service to meet any diverse project needs.

Our well-maintained equipment, including cranes and hoists, is available for short or long-term hire. Safety is our priority, all of the equipment is fully certified and tested. Our experienced staff will assist in selecting the right equipment supported by our engineers who can provide custom solutions when needed. Contact us today to discuss your hire requirement, we are renowned for delivering exceptional service and reliable equipment for all efficient lifting operations.

DESIGN AND MANUFACTURE

At Lifting Projects UK, we prioritise our commitment to our customers. In the rare situation where we are unable to provide the lifting equipment you require, we will go a step further and create a custom design, ensuring it adheres to the EU/UKCA standards during the manufacturing process.

Our team consists of experienced individuals with extensive knowledge in the lifting industry, enabling us to easily envision a solution to address your challenges. This may involve going beyond readily available off-the-shelf equipment. With the assistance of our design and structural engineers, we can deliver a personalised lifting arrangement that perfectly suits your unique requirements.

SPECIALIST PLANT

Lifting Projects offers a comprehensive range of specialised plant equipment to cater to your project needs.

Our extensive inventory includes a versatile jacking system, a reliable HIAB and efficient electric compact cranes. These equipment options are available for hire, complete with skilled operators, enabling you to enhance your company's capabilities and broaden your offerings to customers. By partnering with us, you can access top-notch equipment and experienced professionals to meet the unique requirements of your projects.

YOUR CONFIDENCE IN LIFTING PROJECTS IS SUPPORTED THROUGH OUR COMMITMENTS, ACCREDITATIONS, AND SUSTAINABILITY OBJECTIVES.

At Lifting Projects UK, we operate with sustainability at the forefront of our operation. We recognise the need to identify new and emerging opportunities to improve our environmental impact, energy performance and consumption, to become carbon neutral by 2030. Lifting Projects UK are committed to sustainability as a whole. Our continued compliance is maximised to ensure risk to our corporate sustainability goals are a minimum.

ISO 14001:2015

In order to ensure continued compliance, we are ISO accredited to 14001:2015, and use this to comply with environmentally sound practices to reduce our environmental footprint and impact, demonstrated through our Zero Waste to Landfill policy.

ISO 50001:2018

We have now implemented the framework for a standardised energy management system, in line with ISO 50001:2018, which provides us with a basis to control and manage energy consumption and improve our impact on the environment while reducing the carbon we produce as a company.

Collaboration

Lifting Projects UK are driven to reduce our impact on our supply chain, and foster strong partnerships with our associates, suppliers, and stakeholders, working together to achieve shared goals of sustainability, quality, safety, and excellence. We take pride in the accreditations we hold, which include ISO 9001:2015 and ISO 45001:2018 and use them as a basis to ensure best practice and raise awareness across the company.

Socio-Economic

Lifting Projects UK are committed to reducing its impact on the environment, and is committed to conducting its activities sustainably, prioritising our local community, social justice, and the quality of life for future generations. We aim to manage and reduce the wider impact on society from our activities, while providing support within the local communities in which we operate. We also prioritise the health and wellbeing of our employees and have implemented a company health plan and ongoing training to ensure our staff are happy and healthy.

ACCREDITATIONS
